

PROJECTS

- **POCKET LIBRARY** - With Help of Appian, made the Pocket Library.
 - In this Pocket Library, using integration I have connected with Open Source library in by searching the name we can select book and read it.
 - I have designed the SAIL interface using through which user can mark book as completed and track how many books he has read.
- **Rate Calculator** -With Help of Appian, made the rate calculator application.
 - In this rate calculator application, using Web API have made the connection between Alteryx and Appian.
 - From SQL server we were getting the data and on the basis on user interaction we were sending request to Alteryx for output. Showing the output sent by Web Api through Alteryx.
 - Tech Used – Appian, SQL Server, Alteryx.
- **ATM Application**- With Help of C++, made the ATM Application
 - In this ATM Application, you can check your current balance and also deposit money in account.
 - As authenticated user, you can withdraw the amount from my Bank account.
 - Tech Used - C++
